

Ceetec A250 – flexible and user friendly

The Ceetec A250 machine is the medium sized model in the range and is particularly suited to large hand-craft companies, such as painters, carpenters, timber yards and factories with little or high levels of production.

The machine is often used as a manual machine, with manual feed and removal. If the machine is to be part of a production line, the Ceetec Industry series is recommended.

The wooden item is fed horizontally through the machine with the help of the automatic feed. The Ceetec A250 gives a high finish thanks to the 12 individually adjustable rotating brushes.

Cleaning is fast and easy, requiring approx. 5-10 minutes for daily cleaning and 15-20 minutes for a

thorough clean. Colour can also be changed in just 10.-15 minutes.

The machine is delivered complete with brushes and filter bags, and is ready to use as soon as it is connected to the power source. The Ceetec A250 is a standard machine and can therefore be delivered from day to day.

Extra equipment can also be added, including roller conveyors for input and output, filter bags in varying grades and horsehair brushes. In addition, brush arrangements for removing dust, dirt and splinters can also be purchased. This is particularly appropriate when working with sawn wood.

Advantages of the Ceetec A250

-  Well-suited to both indoor and outdoor coverings
-  Uniform result and a reduction of liquid use of up to 50%
-  Automatic feeding speed with ungraduated settings
-  Tried and tested electronic membrane pump in non-rust materials
-  Average payback time of 40,000 metres of painted wood, equivalent to 20 hours production
-  Ideal for customers with a yearly capacity of up to 500,000 metres

Capacity

960-2500 metres per hour

Material dimensions

Max. H: 100mm x B: 250mm

L: Min. 800mm

Power connection

3 x 400V + PE IP Class 55

Wattage: 0.80 kW

Machine weight

Approx. 300kg.
