

IP 380 Touch

Reliable painting machine for materials measuring 380x250 for production lines or as a stand-alone machine.

Built-in touch screen, standard programs and adjustable brushes and advance speed mean that the IP 380 Touch painting machine provides a uniform quality as well as a high finish. IP 380 Touch is robust, easy to operate, easy to clean and built for production every day. This makes the IP 380 Touch one of the most attractive painting machines on the market for lumber mills, manufacturers of prefabricated houses and industrial companies worldwide.

Profiles:

Technical data

Capacity	From 20 metres/m to 180 metres/m
Material dimensions	10 x 10 mm to 380x250
Number of brushes	8
Number of nozzles	16
Compressed air	Min. 6 bar
Power consumption	16A
Power connection	3 x 380V + PE + IP class 54
Feed height	900 mm (+-50 mm)
Weight	1250 kg
Length x width x height	2400 x 1200 x 2100
Flow direction	Optional

The painting machine ensures uniform quality

IP 380 Touch is equipped with a touch screen which allows you to precisely and accurately set the painting machine for each individual production. You are able to save standard programs, thus ensuring and maintaining a uniform quality for repeat productions and for productions in different factories. The painting machine is designed to easily fit into your existing production line with e.g. automatic feeding, sanding, drying and varnishing.

Any excess paint is recycled in a closed circuit through a filter and back into the container. The closed circuit ensures optimum use of paint.

The flow-coat spray container of the machine may be removed for easier cleaning. This also allows you to work with several colours in individual containers.

Maintenance and spare parts

IP 380 Touch is easy to clean and maintain. You can replace nozzles, brushes and other wearing parts. Naturally, we stock all spare parts so that your painting machine always produce efficiently and highly reliably.

Did you know that,

Ceetec machines are developed and manufactured locally at our plant in Nr. Åby in Funen
Ceetec is a family-owned, Danish company owned by Janni and Jesper Frandsen
Ceetec has supplied quality machines to the wood industry since 1970

Advantages of the Ceetec IP 380 Touch

- High productivity
- Standard programmer
- Uniform quality with high finish
- Easy, simple and quick to clean
- Optional automatic washing program
- Optional combination of spray and flow-coat technologies
