

Ceetec SP250 – Shingle painting machine

The Ceetec SP250 shingle painting machine has been developed according to the same concept as our other painting machines, where key words are flexibility, efficiency and simplicity

The shingles are fed through the machine using an automatic forward drive system and speed is regulated via an un-graduated frequency converter.

Feeding speed is between 16-42 metres per min

Cleaning is fast and easy, requiring approx. 5-10 minutes for daily cleaning and 15-20 minutes for a thorough clean.

The machine is delivered complete with brushes and filter bags, and is ready to use as soon as it is connected to the power source. The Ceetec SP250 is a standard machine and can therefore be delivered from day to day.

Advantages of the Ceetec SP250

- Built especially for painting shingles
- Efficient painting at up to 2.500 per hour
- Easy cleaning
- Small investment and fast pay-back time

Capacity

Up to 2.500 metres per hour

Material dimensions

Max H: 100 mm x W 250 mm
Min L: 300 mm

Power connection

3 x 400 V + J – IP class 54
Wattage: 0.55 KW
